e⁹ earth9

Earth9.com Pte Ltd

A down-to-earth and professional environment, we thrive on a casual atmosphere where we can easily exchange and generate ideas: from the kooky to the seemingly impossible. Diversity is welcomed and celebrated: China, Philippines and India are some of the exotic locales our people have emerged from. If you are excellent at what you do, passionate about doing it well and have no problems rolling up your sleeves to get it done – talk to us.

Developer/Senior Developer

Responsibilities:

- The Developer's responsibilities include building solutions, with emphasis in Microsoft technology-centric solutions; working closely with project managers and technical consultants to understand and manage expectations, as well as participate in the implementation and test effort.
- You will be responsible for developing and supporting web-based applications in an object-oriented environment. You will support existing applications used by the client as well as develop technical documentation, provide support to team members and clients, and test software applications to ensure quality and functionality. You will also participate in design meetings, analyze and research software requirements to determine feasibility of design and marketing requirements within time and cost constraints.
- You should be a self-starter with a can-do attitude that enables you to work independently and be part of a larger team. You will have the opportunity to learn new skills and work with cutting-edge technologies on a wide range of high-impact projects in an organization with several growth opportunities

Requirements:

- **Local fresh graduates from Polytechnic or University are welcome to apply**.
- Diploma or Bachelor's Degree in Computer Science or Engineering.
- At least 2 year industry experience in developing C# web applications with extensive experience in mission-critical, high-performance and real-time trading systems using .NET Framework, particularly C#, ASP.NET and XML/XSLT.
- **For Senior Developer position**, min 6 years of industry experience in developing C# web applications with extensive experience in mission-critical, high-performance and real-time trading systems using .NET Framework, particularly C#, ASP.NET and XML/XSLT is required.
- Mandatory knowledge and experience in the Microsoft .NET Framework (ASP.NET, C#), Object Oriented Application Design, AJAX Programming (JQuery and Javascript), and Structured Query Language (SQL). Database operation and maintenance knowledge on MSSQL and Oracle is a bonus.
- Experienced the full project lifecycle in at least 3 projects.
- Strong written and verbal communication skills, with the ability to work independently and as part of a larger team
- MCAD/MCSD/MCSE/MCDBA certifications will be added advantages
- Proficiency in the following applications e.g. WSS, MOSS, SharePoint Designer, Macromedia Dreamweaver, Adobe Illustrator, Adobe Photoshop, Macromedia Flash will be an added advantages.
